- Mission
- Tokenomics & Launch Dist.
- Conclusion

What We Are ?

Safety

of token holders is the most prioritized for the community and dev's, for example: we will renounce the ownership right away after softcap(from pre-sale) reached.

Revolution of Deflationary Token

global brand of a safe, trusted, fair, borderless and friction-less, gas-free cryptocurrency combining Store-of-Value and passive income

Lasting Token

4% on each transaction is split instantly among token holders and the liquidity pool, reducing supply. SafeUs community is all about rewards and wealth creation, with 2% locked in liquidity and burned forever and another 2% is redistributed to token holders as reward.

Focus

SafeUs is focused on Decentralized, we will support creator and building our own wallet, dex (eg: PancakeSwap) and much more.
